## **DETAILED ACTION**

1. Applicant's November 2, 2005 REMARKS are convincing with regards to the previous Office Action. Thus, the previous Office Action is withdrawn.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 and 30-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 3, "reviewing existing direct sales processes to ensure current policy compliance" is not clear as to what constitutes direct sales processes nor what comprises current policy compliance.

Claim 36, line 3, "considering impact of applicable regulations on electronic sales transactions" is not clear as to what constitutes applicable regulations.

Claim 40, line 5, "a list of prohibited transaction criteria" is not clear as to what constitutes such criteria.

Claim 40, lines 12, 13, "determine legal terms and conditions to associate with the medical device sale requests" is not clear as to what constitutes such criteria.

It appears the subject matter from independent claims 1 and 40 constitute divergent subject matter. Clarification is required.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-10 and 30-48, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginter, US 6,427,140.

Ginter discloses an electronic transaction system, e.g. 2, 4, Figs. 1-87, screening processes, e.g. cols. 1-321, determining and implementing legal terms, e.g. VDE's and paying fees associated with the content, and posting electronic media on a global communications network, e.g. posting to an electronic clearing house or bank. Ginter does not explicitly use the term direct screening process. Official Notice is taken that direct screen processes are common knowledge in the transaction art, as are the recitations of the various dependent claims, e.g. claim 2. Alternatively, it appears Ginter provides a screening process, e.g. use of regular and wide bitmap meters. To have provided a direct sales screening process for Ginter, along with common knowledge business practices within the system of Ginter, would have been obvious to one of ordinary skill in the art.

6. Further references of interest are noted on the attached PTO-892.
